

GUSTAVO AUGUSTO

Full Stack Developer | Payment Systems

São Paulo, SP · Remote | gustavoaugustocar@hotmail.com | LinkedIn · GitHub · WhatsApp

PROFESSIONAL SUMMARY

Full Stack Developer with solid experience in payment systems and financial integrations, working across the entire stack with React, Next.js, TypeScript, NestJS, and Go. Specialist in transactional workflow architecture (PIX, digital wallet, card) with idempotency guarantees and data consistency, as well as integrations with third-party APIs and marketplaces. Self-taught profile with strong track record on demand-driven projects and direct communication with national and international clients.

PROFESSIONAL EXPERIENCE

Full Stack Developer — Backend & Payment Integrations2025 – Present

Renapay / Payco · Remote

- **Architected payment workflows (PIX, digital wallet, card)** in NestJS/TypeScript following the create-then-pay-then-update pattern, with pessimistic locking (SELECT ... FOR UPDATE) and partial unique indexes to ensure idempotency in wallet movements.
- **Integrated PIX payment APIs** from providers Monetarie and Payco (cash-in, cash-out, and refunds), including a complete refactor of webhook handling.
- **Implemented two-factor authentication (TOTP/2FA)** with QR code generation, challenge tokens in Redis and encrypted secrets, plus social login via Google OAuth.
- **Automated purchase cancellation** with asynchronous queues (Bull/NestJS) and @OnQueueFailed listeners, and implemented caching/deduplication with Redis shared between CacheModule and BullModule.
- **Built a self-service kiosk desktop application** with Tauri + React, including a custom virtual keyboard, native geolocation in Rust, and integration with a payment terminal (TEF/SITEF).

Full Stack Developer, Freelance2024 – 2025

National and international projects · Remote

- Developed web, mobile, and back-end applications for different business segments, using React, React Native, NestJS, and PostgreSQL.
- Adapted technical solutions to each client's specific business needs, working independently from requirements gathering through delivery.

Back-end Developer, Freelance2024

Innrev.ai · Remote

- Built a hotel booking service from scratch using NestJS, focused on scalability, performance, and architectural organization.
- Modeled and managed data with PostgreSQL, documenting and validating APIs with Swagger and Zod.
- Collaborated directly with an international client and another back-end developer, participating in technical meetings and solution design.

Front-end Developer2022 – 2024

PDA Soluções · São Paulo, SP

- Managed projects independently from requirements gathering through delivery, acting as the main technical point of contact with clients.
- Defined and implemented development standards (component structure, coding conventions, state organization) adopted by the team, using React and its ecosystem of libraries to improve consistency and maintainability across projects.

Freelance Developer2021 – 2022

Independent projects · Remote

- Worked on projects for different clients following a period of intensive software development studies, building web interfaces with modern JavaScript ecosystem technologies.

FEATURED PROJECTS

- **Marketplace Integrator (Go)** — monorepo with hexagonal (ports-and-adapters) architecture integrating Mercado Livre, Shopee, Amazon, and Magalu.
- **WMS** — management system for distribution centers, with complex business rules and high operational consistency requirements. Stack: React, TypeScript, Redux, Styled Components.
- **Expedia Scrappy** — hotel management platform with a scraping mechanism to calculate and compare average hotel rates. Stack: NestJS, PostgreSQL, TypeORM, Swagger, JWT, Zod.
- **Bleve Landing Page** — landing page focused on conversion, performance, and accessibility. Stack: React, TypeScript, Tailwind CSS, Vite, Framer Motion, React Hook Form, TanStack Router.

TECHNICAL SKILLS

- **Front-end:** React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Styled Components, Redux, TanStack Query/Router, Framer Motion.
- **Back-end:** Node.js, NestJS, Express, REST APIs, TypeORM, Prisma, GORM, Swagger, Zod, JWT, Webhooks, Bull (async queues).
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis.
- **Mobile & desktop:** React Native, Expo, Tauri.
- **Other languages:** Go (data structures, generics, concurrency, database/sql, GORM), Python, and Rust.
- **Tools:** Git, Docker, Bash, Vite, WSL2, pnpm.

EDUCATION

- Self-taught training in Software Development — intensive studies in web development, application architecture, databases, and software engineering through various professional courses.

LANGUAGES

- Portuguese: Native
- English: Advanced
